 GitHub |  LinkedIn |  Portfolio

Career Objective

Motivated engineering student with a strong foundation in software development, AI, and data-driven technologies. Seeking opportunities to design and build scalable digital solutions that drive innovation, enhance user experience, and contribute to organizational growth.

Education

• Dayananda Sagar College of Engineering

Bachelor of Engineering (B.E.), Computer Science and Business Systems

– CGPA: **9.7/10.0**

2023 - 2027

Bengaluru, India

Experience

• Full Stack Developer Intern — Joveo

New Initiatives Team

Jan 2026 – Present

Onsite, Bengaluru, India

- Contributed to building a scalable job board platform by implementing job categorization, recommendation features, UI components, and database solutions.

Technical Skills

- **Programming:** C, C++, Java, Python
- **Web Technologies:** HTML, CSS, Bootstrap, JavaScript, Node.js, React, Flask
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools & Platforms:** Git, VS Code, Linux, Figma

Projects

• AI-Powered Agriculture Monitoring System (AgriCare)

Tools: React, Node.js, Flask, Random Forest, Flutter, Leaflet.js

2025  GitHub [Link](#)

- Built a hyperspectral image analysis system for crop health and disease detection using Random Forest and Flask.
- Designed dual dashboards (Farmer & Researcher) with multilingual support, text-to-speech, and dynamic trend graphs.
- Integrated Leaflet-based map visualization and partially developed a Flutter mobile app.

• AI-Powered Web App (DocsAI)

Tools: React (Vite), Node.js, OpenAI API, Render

2025  GitHub [Link](#)

- Developed a full-stack AI chatbot web app achieving real-time responses under 1.2s.
- Implemented modular architecture (90% code modularity) and secure API handling via dotenv.
- Deployed with 99.9% uptime on Render.

• Smart Traffic & Safety AI System

Tools: YOLOv8, OpenCV, EasyOCR, Geospatial APIs

2025  GitHub

- Designed an AI system for dynamic traffic signal control and violation detection.
- Achieved 85% accuracy in speed and helmet detection using computer vision.
- Integrated crime mapping with nearby police stations using geospatial APIs.

Awards & Recognition

- Winners (AI in Edge Computing Track) – SDG Innovator Hackathon 3.0
- 2nd Runner Up – AI Agent Hackathon (Product Space)
- 3rd Place – National Symposium Poster Presentation (AI)
- 2nd Place – Comeback Challenge (Business Strategy)

Certifications

Certified in C, C++, DBMS, Python, Deep Learning, Generative Models, Agile Scrum in Practice, and Computer Vision. [Click here to view Certificates](#)

Extracurriculars

Design Team Head of Udbhava club; actively contributed to organizing and managing events.
